ABOUT US

In the first quarter of 1990, Injaz Company started to perform the decoration projects in Jordan. In 2005 Hani Al Khateeb upgraded his company to become Hani Al Khateeb Est. by joining team of business developer and operations for higher standard of quality and performance.

During the past 20 years we earned the required experience that made us distinguished among the others, once you see a beautiful work as a decor you will definitely remember Decor & More Est. with its significant work which extends in the Interiors, Exteriors and Landscape fields.

And since 2016 Decor & More has started offering its services in Qatar and grew rapidly in the Qatari market to build a strong name in the decoration field.

Our Services include many of the Private and Public Projects, we added a touch of beauty and elegance on these projects and anyone would see our proficiency became eager to do the same as we are an agency contributing in adding an aesthetic value to homes and any other entities.

Strategy formulation and Strategy Implementation

Our Design Process

Interior Design has develop a specific design process which is divided into key phases; programming; conception; resolving; detailing, documenting and realizing. We create a success strategy from the onset to meet the project management and design needs for each client. Our exceptionally talented team produced high end quality design form our inerior detailing to the “final dressing” the difference is the details.

Our Design Process

Programming

The first phase of our projects is the programming phase. The phase is presigning and is critical to determine scope of work and identify the project team, understanding the critical path of the project level of detail and finishes needs. furnishing style. budgetary requirements and identify preferred vendors are key to programming every project.

Conception

The first design phase is the concept phase. In many cases this phase may be broken into two distinct milestones; concept and schematic design. Within the concept milestone; plan review, space planning mood imagery, and initial material palette ideas are developed. Within the schematic milestone; interiors sketches, elevations, ceiling design, flooring patterns. furnishing mood and preliminary finish selections are developed for the key spaces.

Resolving

After the design development phase is completed, the project is at point where the design can be resolved; when all of the decisions of the client team came together and the interior design documentation begin to take shape. preliminary set of documents may be issued, including furniture plans, reference plans, ceiling plans, floorin and tiles plan, lighting plans and interior elevations.

Documenting

After the design details are developed and coordinated, the production of the working drawings is developed with the required construction information. in addition to the set of drawings, supplemental specification packages of plumbing lighting. cabinetry finishes and paint schedules are submitted. The documentation type is specifically tailored to the needs of the project and client.

Realizing

The Implementation of the design is overseen by the design team. They work Closely with the consultants and contractor, problem solving as needed, through all stages of the construction process. This phase also included review of shop drawings and other consultant. Coordination as they really of the spaces comes to life. Installation of the furnishing and adding the final touches are the conclusion and most exciting milestone of the realization of the design for each project.

Project Monitorization/Control

Typical project controls are Steering Committee Meetings, Monthly Status Reports, Risk Management assessment and mitigation Planning and monitoring, issue Management Change Management, and Communication Management.

1. Steering Committee Meetings.

A Steering Committee should be selected at the beginning of a project, usually in the preinitiation Stage. In general, the Steering Committee is a senior management team that guides and is accountable for the project and gains management commitment.

2. Risk Management

Ensure the project risks and associated mitigation actions are monitored and controlled in accordance with the Risk Management Plan.

3. Issue Management

Project-related issues will be tracked, prioritized, assigned, and communicated in accordance with the project Management procedures: issue descriptions, owners, resolution and status will be maintained on an issues database in a standard format. issues will be addressed with the Project Owner and communicated in the project a weekly status report.

4. Change Management

The change control procedures to be followed will be consistent with Project Management Procedures and consists of the following processes: A Change Control database will be established by the project manager to track all changes associated with the project effort, All Change Requests will assessed to determine possible alternatives and costs. Change Requests will be reviewed and approved by the project owner. The effects of approved Change Requests on the scope and schedule of the project will be reflected in updates to the project plan. The Change Control database will be updated to reflect current status of Change Requests.

5. Communication Management.

The following strategies have been established to promote effective communication within and about this project:

Most project manager rapidly come to understand the need for good, clear communication tailored to the needs of the recipient. It has been stated that the success of any project depends on communication and that most project failures can be traced either to poor communication or a lack of needed communication.

Project Monitorization/Control

ROLES AND PROJECT STAKEHOLDERS

Quick Adoption of newer Technology

In order to maintain our EDGE and stay ahead in our market we make sure that we have latest equipment helping us deliver best quality products in lesser time

Sound relationship with Suppliers

We have been established for more than 25 years in Qatar market As a gradual progression we have developed thorough understanding of market and we have developed sound relationships with our suppliers helping us procure at best prices Our customers receive direct benefit of breaks which we receive from our suppliers

DECOR & MORE CARPENTRY FACTORY

Our commitment is to:

- * Eliminate HSE incidents across our operations
- * Prevent pollution
- * Investigate and prevent recurrence of quality and HSE related non conformances
- * Set tough but achievable QHSE objectives, monitor progress and ensure continuous improvement
- * Minimise our impact on the environment
- * Train and develop all our employees
- * Ensure compliance with all applicable local and international legislation

The company's integrated management system is based on the principles of ISO 9001: 2008, ISO 14001:2004, and OHSAS 18001 and incorporates the requirements of the IMO: ISM code for the safe management and operation of our vessels. The management system is accredited by the British Standards Institute. Our jackup barges working in the North Sea also comply with the Offshore Installations (Safety Case) Regulations 2005. The Safety Case approach to managing risk is a standard also applied to the rest of our fleet working outside the UK.

DECOR & MORE CARPENTRY FACTORY

Carpentry deals with the processing of wood to obtain desired shapes and sizes. The process dealing with the technique of making wooden pattern is called pattern making.

WOOD RASP FILE AND RASPS:

Files and Rasps are shown in Fig. They are used for maintaining other wood working tools and equipment. They are made of hardened tool steel which is tempered and they should never be dropped as they are very brittle to break. They are of various types depending upon their size, shape, cuts and degree of their coarseness.

CLASSIFICATION OF CARPENTRY TOOLS:

1. Marking and Measuring Tools
2. Cutting and planing tools
3. Drilling and boring tools
4. Striking tools

PROFESSIONAL GAS FIREPLACE CONTROL SYSTEM

*To Get Heat Is Not That Difficult
Tired Of Bending Down To Operate Your Gas Fire?
Have FP-10 Gas Valve Remote Control System Apply In Your Gas Fire
Enjoy The Easy Operation On The Sofa*

FP-10 is the full-sequence gas valve remote control system in RF transmission version.

It brings the customers the convenience of the operation. FP-10 could be complied with either KUPO's standard 18" bracket and imitation log or your own-design parts.

THE ADVANTAGES FP-10 CAN PROVIDE

- Full-sequence remote control system
- Five-level flame modulation from High to Low by DC 5V stepping motor
- Ignition by high-voltage coil winding
- Plug & Play installation
- Easy operation
- Sleep timer
- Thermostatic function
- DC shut off valve

GL-18 is our standard gas log in 18" size assembled with FP-10 gas valve remote control system.

GL-18 SPECIFICATION

- Flow Capacity:
NG : Above 50,000 BTU/hr (1130 L/h)
LPG : Above 80,000 BTU/h (1160 L/h)
- Metallic Bracket Size: 18" (24" is under development)
- Burner Length : 29cm
- Gas Type : NG (Methane) or LPG (Propane)
- Power Source (Transformer) : 100-240V
- Battery Pack : AA/4pcs, 6V
- Artificial Log : Cement-5PCs/Set in 13kgs

ENJOY THE EASY OPERATION ON THE SOFA

HSE Programme & Policy

HSE Programme

HSE POLICY

- Commitment to minimize environment impact
- Personal safety and the protection of the environment
- Accidents and injuries can be prevented
- All tasks will be planned before implementation
- Be responsible for HSE at work
- Management will train employees to work safely
- Full cooperation to CLIENT, constitutional authorities and local communities

PERSONNEL PROTECTIVE EQUIPMENT

- Safety Helmets
- Safety Boots
- Goggles
- Face Shields
- Ear Muffs
- Dust Masks
- Safety Gloves
- Safety Harness
- Coverall

HOT WATER AND WATER CONSUMPTION

Water Consumption per 12 hrs day is 4 Liters

GENERAL HEAT STRESS INDEX

DANGER CATEGORY	HUMIDEX VALUE	HEAT SYMDROME	RESTING TIME	WATER NEED
Extreme Danger	55°C and Above	Heat Stroke or Sun Stroke Imminent	15 minutes / hour	1 glass* /10 minutes
Danger	46°C- 54°C	Sunstroke, Heat Cramps, or Heat Exhaustion likely, Heat Stroke possible without prolonged exposure and physical activity.	10 minutes /hour	1 glass* /10 minutes
Extreme Caution	40°C- 45°C	Sunstroke, Heat Cramps, or Heat Exhaustion possible with prolonged exposure and physical activity.	7 minutes /hour	1 glass* /15 minutes
Caution	30°C- 39°C	Fatigue possible with prolonged exposure and physical activity.	No Requirement	1 glass* /20 minutes

TOOLBOX TALK

To be done before the start of every shift and agenda should include the following and a copy should be kept for safety audits:

- Highlight the Hazards - Electrical, Fall, Trapped in confined space, Tripping, ect
- Compliance - Signage's Fire Safety Guidelines
- Cont PPE Requirements for the work
- Climate Considerations (hot weather/Strong wind / Heavy rains)
- Emergency Evacuation & First Aid Guideliness
- Housekeeping
- Others as required

Fall Protection

Introduction

Unless working on a ladder, scaffold or scissor lift, OSHA enquires fall protection when exposed to a 4-foot fall or greater.

Source of photos: Honeywell/Miller; used with permission.

Common Fall Hazards

- Overhead Platforms
- Overhead Runways
- Elevated Work Stations

Distribution

Travel distance to extinguisher: 75 ft

For Class K (grease fire areas): 30 ft

A simple fire extinguisher training technique to use with employees is the PASS method:

- Pull the pin on the extinguisher.
- Aim the hose nozzle low toward the base of the fire.
- Squeeze the handle to release the extinguishing agent.
- Sweep the nozzle from side to side at the base of the flames until extinguished.

INDICATORS		FIRE EXTINGUISHER		FIRE EXTINGUISHER		FIRE EXTINGUISHER		FIRE EXTINGUISHER		FIRE EXTINGUISHER	
TYPE OF EXTINGUISHER		WATER		FOAM		DRY CHEMICAL		CARBON DIOXIDE		HALON	
CLASS AND TYPE		CONTENTS		ELECTRICALLY CONDUCTIVE		CONTENTS		ELECTRICALLY NON-CONDUCTIVE			
A	Ordinary combustibles (wood, paper, etc)	✓	YES	✓	YES	✓	YES	✓	YES	✓	YES
B	Flammable liquids	✗	NO	✓	YES	✓	YES	✓	YES	✓	YES
C	Flammable gases	✗	NO	✗	NO	✓	YES	✓	YES	✓	YES
D	Combustible metals	✗	NO	✗	NO	✗	NO	✗	NO	✗	NO
(E) Fire involving live electrical equipment		✗	NO	✗	NO	✓	YES	✓	YES	✓	YES

BLOOD BORNE PATHOGENS

With today's danger of AIDS and hepatitis B, you have to be careful. But don't let this stop you from giving First aid.

If you notice blood, do not touch it or clean it, contact the safety department or certified first aider for help.

Always use the appropriate gloves and never dispose of contaminants in normal waste bins.

ELECTRICAL SAFETY

Electrical equipments must have the appropriate inspection stickers by a competent electrical engineer and a copy of the equipment list with inspection details to be submitted to safety department. inspection stickers are to be replaced quarterly.
