

The background of the cover is a photograph of a modern kitchen with wooden cabinetry and a grey countertop. Overlaid on the left side is a diamond-shaped collage of three images: a worker in a red jumpsuit, a worker in a blue shirt using a power sander, and a worker in a pink shirt. The collage is decorated with several colored diamonds (green, white, yellow, purple) and a black border.

DECOR & MORE CARPENTRY FACTORY

Our commitment is to:

- * Eliminate HSE incidents across our operations
- * Prevent pollution
- * Investigate and prevent recurrence of quality and HSE related non conformances
- * Set tough but achievable QHSE objectives, monitor progress and ensure continuous improvement
- * Minimise our impact on the environment
- * Train and develop all our employees
- * Ensure compliance with all applicable local and international legislation

The company's integrated management system is based on the principles of ISO 9001: 2008, ISO 14001:2004, and OHSAS 18001 and incorporates the requirements of the IMO: ISM code for the safe management and operation of our vessels. The management system is accredited by the British Standards Institute. Our jackup barges working in the North Sea also comply with the Offshore Installations (Safety Case) Regulations 2005. The Safety Case approach to managing risk is a standard also applied to the rest of our fleet working outside the UK.

DECOR & MORE CARPENTRY FACTORY

Carpentry deals with the processing of wood to obtain desired shapes and sizes. The process dealing with the technique of making wooden pattern is called pattern making.

WOOD RASP FILE AND RASPS:

Files and Rasps are shown in Fig. They are of used for maintaining other wood working tools and equipment They are made of hardened tool steel which is tempered and they should never be dropped as they are very brittle to break They are of various types depending upon their size, shape, cuts and degree of their coarseness

CLASSIFICATION OF CARPENTRY TOOLS:

1. Marking and Measuring Tools
2. Cutting and planing tools
3. Drilling and boring tools
4. Striking tools

DECOR & MORE CARPENTRY FACTORY

Solid Wood:

Solid wood term most commonly used to distinguish between ordinary lumber and engineered wood, it also refers to structures that do not have hollow spaces Engineered wood products are manufactured by binding together wood strands, fibers, or veneers with adhesives to form a composite material.
